

SAIPOL

TECHNOLOGIES

SAIPOL TECHNOLOGIES IS A SPECIALIST MANUFACTURER OF CUSTOMISED FILTRATION PRODUCTS, DESIGNED TO SERVICE A RANGE OF SECTORS, WITH APPLICATIONS IN TRAVEL, HOSPITALITY, RESIDENTIAL & COMMERCIAL USE.

For over twenty years SAIPOL and its affiliate companies have been designing and creating customised filtration solutions for a range of markets and industries.

Designed with performance in mind, all SAP series filters are manufactured to the highest standards of product quality and efficacy.

The SAP series of snap-in cartridge filters are designed to retrofit Cuno, Everpure and Zip style drinking and boiling water filter cartridges. SAIPOL also manufacture several models to accommodate a range of system head designs and configurations, ensuring all of your filtration needs can be met.

Contact SAIPOL or your nearest stockist for more information.

FEATURES

Comprehensive range of designer filter head and cartridge medias.

Provides enhanced and ongoing equipment protection and optimum beverage quality.

Robust, durable cartridge construction.

BENEFITS

Choice of models designed for multiple water quality conditions.

Ensures ongoing and reliable filtration performance whilst providing continued protection.

Built for longevity and reliability in service.

CARTRIDGE SPECIFICATIONS

Materials of construction:	Virgin Polypropylene
Micron Rating:	0.5 or 5 Micron (Depending on model)
Design Pressure:	875 Kpa
Operating Temperature:	Up to 38°C
Optimum Cartridge Flow Rate:	2-3.5 LPM
Performance Removal Claim: (* on select models)	Triple Action / Dirt Rust Activate Carbon Cyst Reduction

Saipol Product Line Extensions

STANDARD

- Triple Action - Sediment, Scale Reduction, Taste and Odour
- Choice of 5 or 0.5µm
- Available across all Zip models
- NSF Listed Carbon materials
- Fully Watermarked

C GRADE

- 1µm sediment removal
- Double Action - Reduces Sediment and Scale
- NSF Listed materials
- Watermark Approved
- Retrofits across all existing Zip filter platforms
- Fully Compliant with Queensland Health Directive 1/2016

A GRADE

- 0.22µm Absolute rated filter media
- Double Action - Reduces Sediment and Scale
- Bacteria Reduction - log reduction 7 (99.995% reduction) across a panel of bacteria and viruses
- Fully Compliant with Queensland Health Directive 1/2016

TABLE 1 - BACTERIA CHALLENGE DATA - SAIPOL A GRADE FILTERS

TEST STANDARD	BACTERIA	LOG
ASTM838	Pseudomonas Diminuta	6
P231 (NSF)	Klebsiella terrigena	6
	Poliovirus 1	4
	Rotavirus	3
	Cyst	3
P244 (NSF)	Routella terrigena	6
	fr coliphage	4
	MS2 coliphage	4
	Cyst	3

Saipol's range of bacterial retentive - 0.22µm filters are challenge tested with a panel of industry specific and recognised bacteria and other contaminating micro-organisms as shown in Table 1.

Note:

The average size of Legionella bacteria is 0.5-1.0µm in diameter x 1.0-3.0µm long.
